

Personalised Lifestyle Programme: Dominant Sanguinous sub-dominant Bilious Temperament

Overview

As **heat** is the dominant quality associated with your temperamental combination, **an increase in heat** from the **Six Lifestyle Factors** will **negatively affect you to the greatest extent**. An increase in moistness and dryness will also affect you, but to a lesser extent, whereas an increase in the quality of **coldness will be beneficial for you**.

An **increase in heat** can be as a result of:

summer	very hot weather
humid environment/weather	Hot & Moist and Hot & Dry food and drink
anger	strenuous exercises
not enough sleep	

The **illnesses** that this combination are inclined to are those associated with the dominant Sanguinous Temperament:

Congestive headache	High blood pressure
Diabetes	Urinary tract infection
Rheumatoid arthritis	Pre-menstrual tension.

To a **lesser extent** this combination will also be inclined to illnesses of the Bilious Temperament:

Migraine	Stress
Bronchitis	Overactive thyroid
Hay fever	Endometriosis

Health Promotion for this temperamental combination

As **heat** is the dominant quality associated with your temperamental combination an excess of **heat** from the lifestyle factors will have a negative effect on you.

Food and Drink

Ideally your combination should eat mostly **Cold & Dry foods**, followed by **Cold & Moist foods**, less of **Hot & Dry foods**, and the least amount of **Hot & Moist foods**.

Listed below are the four different diet charts

Cold & Dry Foods

Meats	Vegetables	Fruits	Nuts	Grains & Seeds	Dairy Products	Oils	Spices & Herbs	Drinks	Flavourants	Condiments & Spreads	Confectionary & Desserts	Cereals	Dishes
beef	brussel sprouts	(all sour fruits)	peanuts	barley	sour cream	coconut oil	basil	coffee		balsamic vinegar		cornflakes	sour dishes
biltong (beef)	cabbage	green apples		beans(all types)	egg white	corn oil	tamarind	ice		sour fruit juices tea (black)		peanut butter	maltabella

liver	spring onion	peaches			rye bread	mother's milk		ginger, fennel						herbal teas		vermicelli	nutri-k
mutton	sweet potato	papaya			sunflower seeds	(for babies)		green masala						(see herbs)			nutrific
turkey	turnips				wheat	fresh cream		marjoram									oats
					macaroni			mint, sage									puffed wheat
					dill seeds			soya sauce									taystee wheat
								thyme, turmeric									weetbix
								watercress									
								white pepper									

Additional dietary advice:

- Stick to the above diet especially in summer, spring and in coastal areas.
- Avoid spicy, processed, and salty foods.
- Drink at least 2 litres (8 glasses) of water per day.
- Eat simply and avoid eating a lot of different types of foods in the same meal.
- When emotional or upset, sit down, take a few deep breaths, or drink a glass of water.

Environmental Air & Breathing

- Keep cool in hot weather.
- Recommended breathing exercises include the *Tibb Slow and Deep* breathing, *Tibb Deep Rhythmic* breathing, the *Tibb Mental/Emotional* breathing exercises:

The Tibb Slow and Deep Breathing Exercise

This exercise has a calming effect and therefore is ideal in meditation exercises for all temperamental types, especially for people with a dominant/sub-dominant bilious temperament.

- Sit on the floor in a squatting position with hands on thighs or in the 'lotus' position, keeping a straight back in both cases. If neither position is possible, then lie on the floor or sit in a comfortable chair.
- Close your eyes and focus on your breathing.
- Take slow and deep breaths, breathing out through the nose, distending, and filling the stomach.
- Continue breathing this way for 5 minutes.

The Tibb Deep Rhythmic Breathing Exercise

This exercise is prescribed for all temperamental types. Try doing it on a regular basis, preferably in the early morning.

- Select a protected time and space.
- Sit on the floor in a squatting position with hands on thighs or in the 'lotus' position, keeping a straight back in both cases. If neither position is possible, then lie on the floor or sit in a comfortable chair,

- Draw a breath through the nose.
- Hold the breath as long as possible.
- Gaze upwards, and exhale forcefully through the mouth – the mouth should be opened in an 'O' shape.
- Repeat to a maximum of 15 times

The Tibb Mental/Emotional Breathing Exercise

This exercise is also prescribed for all temperamental types. It creates harmony in the two hemispheres of the brain. Do this exercise early in the morning or late afternoon.

- Select a protected time and space, free from interruptions.
- Sit on the floor in a squatting position with hands on thighs or in the 'lotus' position, keeping a straight back in both cases. If neither position is possible, then lie on the floor or sit in a comfortable chair,
- Your right index finger should be used to close the left nostril. Take a long, deep breath through your right nostril, and hold for 15 to 20 seconds,
- Release the finger closing the nostril and close the right nostril with the right thumb.
- Breathe out through the left nostril forcefully. This counts as one complete breath.
- Repeat the same process starting with the opposite nostril.
- Start by doing 5 breaths, and slowly build up to 10.
- After completing the exercise, rest for at least 5 minutes in the same position.

Physical Exercise

- Inadequate rest and strenuous exercise will negatively affect your temperamental combination
- Aerobic exercises are beneficial
- Pilates is advisable
- Include in the choice of physical exercises, the *Tibb Walking* Exercise, and the *Tibb Jogging* Exercise:

The Tibb Walking Exercise

- Warm up by walking normally, swinging your arms gently. Do this for about 2 minutes initially.
- Then walk briskly, raising the legs and swinging your arms firmly. Do this for about 5 minutes.
- Then cool down by walking normally, as in the warmup. Do this for about 2 minutes.
- Do these exercises daily but increasing the time for each session weekly to a maximum of 25 minutes per session.

The Tibb Jogging Exercise

- Jog on the spot, lifting the knees as high as possible, putting the weight only on the balls of the feet – (prancing). At the same time swing arms in a full circular motion.
- Start by doing this for 30 seconds building up to 5 minutes.
- Increase gradually by 30 seconds, to a maximum of 10 minutes per session.

Sleep

- Six to seven hours sound sleep is essential. Early to bed and early to rise is best for everyone but especially for the dominant Sanguinous temperament.
- Lack of sleep (less than five hours on a continuous basis) and late nights will negatively affect you.

Emotions & Feelings

- Extreme emotions of worry, anger and excessive excitement are the emotional excesses of your temperamental combination and should be managed with breathing and meditation exercises.
- A 5 -10-minute relaxation break after lunch is beneficial.
- The following meditation exercises are advised together with the ***Tibb Slow and Deep Breathing Exercise***, the ***Tibb Heart Meditation Exercise***, and the ***Tibb Pineal Body Meditation Exercise***.

The Tibb Heart Meditation

- Sit in a relaxed state in a calm environment, with your eyes closed.
- Concentrate on the heart and breathe deeply.
- Hold breath for a while and breathe out slowly in the same manner.
- Continue this exercise for 10 – 15 minutes.

The Tibb Pineal Body Meditation

- Sit in a relaxed state in a calm environment, with your eyes closed.
- Concentrate on the area between the eyebrows and breathe deeply.
- Hold breath for a while and breathe out slowly in the same manner.
- Continue this exercise for 10 – 15 minutes.

Elimination

- A regular high-fibre diet should be adopted to keep your colon clear.
- Natural laxatives should be taken regularly.
